

CONCRETE QUALITY CONTROL INSPECTOR

Do you aspire to be involved in some of the GTA's most unique and large-scale construction projects? Help us build the future, and we'll help you build a rewarding and purposeful career.

Bridge Check Canada Ltd. is a specialized engineering/consulting firm focused on bridge engineering, construction materials engineering and construction support services. Our strength is a combination of our passionate, qualified, and experienced staff, who use leading-edge technologies and innovative solutions in our comprehensive laboratory facilities for high-quality services. We pride ourselves on staff retention, teamwork, diversity, and being specialists in our areas of expertise. Safety is our priority, quality is our standard.

Bridge Check Canada Ltd.'s specialties are:

- ❖ Bridge Engineering - Condition Surveys & Biennial Inspections
- ❖ Construction Materials Engineering
- ❖ Construction Support Services - Inspection & Testing

Bridge Check Canada Ltd. is currently seeking **Concrete Quality Control Inspectors** to join our Materials Testing & Inspection Team in our CCIL-certified laboratory in Vaughan, ON, with a strong focus on concrete/shotcrete inspection and testing.

Reporting directly to the Manager of Field & Laboratory Testing Services, you will play a pivotal role in field testing, inspection and sampling of construction materials, including:

- On-site inspection and testing of concrete, shotcrete, grout and mortar.
- Field testing to include sampling, casting, coring and NDT testing.
- Maintain accurate and complete digital records of testing activities.
- Assist in proper care, control and maintenance of testing equipment, including timely calibrations of assigned equipment.
- Follow all company and regulatory safety policies and procedures.
- Complete reports and checklists as per company policies and advise supervisors of any non-conformances and deviations.
- Assist with laboratory testing of materials, when required.
- Perform other duties as instructed.

CCIL/ACI certification is preferred, with at least 1 year of practical field experience. A valid driver's license and strong verbal communication skills is mandatory. Expected compensation range: \$22-25/hr. Artificial intelligence is not being used in the screening, assessing or selection process. This position is for an existing vacancy.
